

Russell Group universities and Brexit

Summary

We welcome the reassurances the Government has been able to give on EU students, Horizon 2020 and regional EU funding so far. Our universities are just as open and welcoming to students, staff and ideas as we were before the EU referendum and we will continue to work with partners across Europe and more widely to boost the UK's international competitiveness.

The referendum result will have a significant impact on our universities and thus on the wider communities, business and other partners they work with. Uncertainty over the UK's future relationship with the EU is in itself a major concern.

As anchors for growth in their regions and nationally, Russell Group universities contribute over £32 billion a year to the UK economy. There is an opportunity now for UK universities and science to be at the heart of the Government's new Industrial Strategy as key drivers of economic growth, productivity and innovation.

Key priorities for the Government in the upcoming negotiations with the EU should be:

- (a) Ensuring UK universities can continue to recruit and retain talented staff and students from across the EU and more widely without bureaucratic visa burdens
- (b) Ensuring the UK can continue to have full access to and influence over Horizon 2020 and future EU research and innovation programmes and infrastructures with a focus on excellence
- (c) Ensuring the UK can continue to participate in the Erasmus+ programme.

The Government should also commit to increasing investment for universities to replace any lost funding from the EU as part of efforts to ensure we continue to be a globally competitive scientific nation and to strengthen the pipeline for growth and jobs in the UK.

Students

Excellent EU students are indispensable for world-class universities, contributing to a diverse student body and a thriving society, culture and economy. There are 58,000 students of other EU nationalities at Russell Group universities, making up 8% of undergraduate students and 15% of postgraduate students.

The reassurances Government has provided for current EU students and those starting courses in 2016/17 and 2017/18 have been very helpful, but it won't be long until universities start recruiting for courses in the following years and they need to be able to tell incoming students what their terms will be before they start.

We are seeking the following reassurances:

- Continued clarity on the fee rate and access to student loans and grants for EU students considering studying in the UK throughout the transition period before Brexit, particularly those starting in 2018/19 – this applies to postgraduate students as well as undergraduates
- Confirmation of the immigration status of existing and prospective EU students and their right to remain in the UK for work or postgraduate study
- Confirmation of the fee rate EU students might move to and when this would come into effect.

Staff

A strong base of talent from Europe and across the world enables research-intensive universities to remain globally competitive and is fundamental to excellent research, innovation and education. EU staff members make a significant contribution to our success, in particular to the excellence of the UK research base and in teaching key subjects vital to the UK economy, such as STEM and modern languages.

Currently, there are around 22,800 members of staff from other EU countries at our universities: 14% of the overall workforce, 21% of academics and 25% of staff on research-only contracts are EU nationals.

We welcome the Government's confirmation there will be no immediate changes to the circumstances of EU nationals currently in the UK, including those studying or working at UK universities. Russell Group universities have also been reassuring their EU staff and students about this. However, there is understandably a high degree of uncertainty, which impacts on our ability to recruit and retain the highly-skilled staff we need from abroad.

We are seeking the following reassurances:

- Confirmation of the continued working rights for current EU staff (and their dependants) at UK universities and for those who take up positions during the transition period before the UK has left the EU. We would want staff and their dependants to retain the same rights to stay and work without a visa that they have now (with no time limit placed on this)
- In the longer term, we want to ensure our universities can continue to recruit the talented staff they need from all over the world without overly-burdensome visa requirements.

Research funding, collaboration and mobility

Research and innovation are global pursuits and are most effective when ideas and people are mobile across borders. The free movement of talent, the networks, collaborations, critical mass of research activity and funding (focused on excellence) that we gain from EU membership contributes to the competitiveness of our leading universities and the UK economy as a whole.

EU funding is increasingly valuable for funding ground-breaking, collaborative and interdisciplinary research – in particular for multi-lateral collaborations where we can tap into expertise from a number of countries. Research income from the EU represented 13% of the collective research grant income to Russell Group universities in 2014/15, up from 8% in 2007/8 – equivalent to over half a billion pounds.

We are seeking the following reassurances:

- A clear commitment that the Government will prioritise research and innovation in the upcoming negotiations, with a view to ensuring continued UK participation in EU research (including research infrastructures), for the full duration of Horizon 2020 and future Framework Programmes with a focus on excellence.
- We welcome the commitment of an additional £4.7 billion investment in R&D over the course of the Parliament. The Government should produce a roadmap to increase public and private sector investment in R&D in the UK to 3% of GDP, particularly to support universities' international collaborations post-Brexit. This will be important to replace any lost EU funds and to ensure the UK remains a globally competitive scientific nation.
- A commitment that the Government will look to secure continued participation in Erasmus+, which contributes to social mobility and has a positive impact on graduate employability.

The Brexit negotiations must seek to maintain our status as a competitive and outward-looking nation, to drive world-class research and innovation at our leading universities for the wider benefit of the UK economy, society and culture.
